

Usage and care instructions

Dynair Wedge Ballkissen Kids / Premium / Plus

Congratulations on your purchase of the Dynair Wedge Ballkissen.

Having purchased the Dynair Wedge Ballkissen you have chosen a TOGU® branded product which is "Made in Germany"!

It is made in conformity with the applicable EU regulations for sports equipment, it contains no heavy metals and is made of 100% recyclable plastic.

The Dynair Wedge Ballkissen is shipped from our factory with a ready-to-use, comfortable air filling. You can, however use the enclosed TOGU air pump for easy regulation of the air filling.

The inflation / deflation needle is recessed into the head of the air pump handle under the small cap.

To deflate the Dynair Wedge Ballkissen somewhat, moisten the needle, then introduce it straight into the valve and pump the needed air into it.

In - deflating:

Before introducing the needle pinch the Dynair Wedge Ballkissen valve between two fingers and pull up a little, since otherwise you might puncture the other side of the product. To avoid damaging the valve, use only the pump supplied with the product.

Never pump up the Dynair Wedge Ballkissen until it is filled tight. Less internal air pressure is more beneficial, since only then can the desired fine vibrations be transmitted to the vertebral disc and column.

Always moisten the needle of the pump before carefully inserting it into the needle valve.

Equipment details:

The Dynair Wedge Ballkissen is made of high-quality Ruton.

Measure: approx. 29 x 29 cm / approx. 36 x 37 cm / approx. 37 x 40 cm

Load capacity: approx. 200 kg

Thermal stability:

The Dynair Wedge Ballkissen is UV-resistant and also heat-resistant to a limited degree. It can easily withstand temperatures of up to 45°C. However, the Dynair Wedge Ballkissen should be kept out of direct sunlight (e.g. do not store in the window). The material softens as it gets warmer.

The Dynair Wedge Ballkissen is also resistant to cold, but should nevertheless not be stored at temperatures below -10°C. The material hardens as it gets colder.

Care:

Any mild standard cleaning agents and disinfectants can be used to clean the Dynair Wedge Ballkissen. Solvent-based, acidic or caustic cleaners will damage the material.

Avoid contact with sharp or pointed objects. The Dynair Wedge Ballkissen assumes body temperature within a few minutes. The nobby side provides for enhanced air circulation while sitting.

The Dynair Wedge Ballkissen is waterproof.

Storage:

Please always store your Dynair Wedge Ballkissen in a horizontal position.
